

SPINCONTROL PRESENTATION

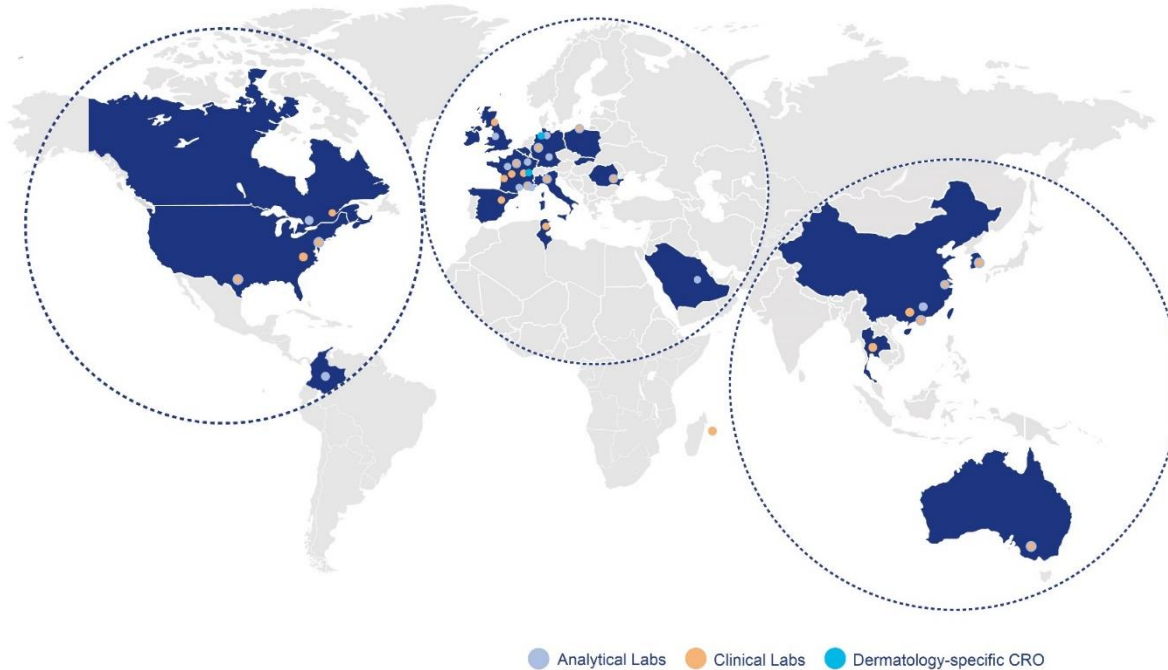

2024

Clinical Research Organization specialized in the evaluation of the efficacy and the tolerance of any product with cosmetic, aesthetic or well-being claims.

C&PC International Business Line

Global Expertise, Personal Touch

24 CLINIC LABS

**16 CONSUMER &
SENSORY FACILITIES**

Behind Eurofins Spincontrol

Global Expertise, Personal Touch

Global expertise

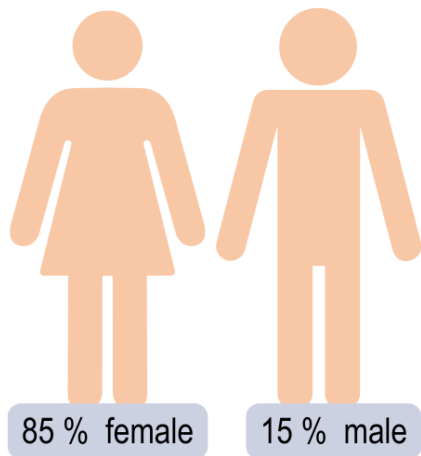

- **Tailor-made protocols**, from standard to innovative methods
- **In-house image analysis**
- **Emotion test**
- **Quality system based on 2 quality standards:**
 - Compliant with **ISO 9001** standard since 2005
 - Studies conducted in the “*spirit of the GCP*”
- **Marketing & regulatory monitoring**

Efficacy tests & Techniques

Global Expertise, Personal Touch

Our clinical studies can be performed according to different protocols

Consumer approach

Targeted consumers will be asked to evaluate the product at home and to fill out a questionnaire at the end of the study.

Technical approach

This approach is based on the use of instrumentations which allow quantitative and/or illustrative results
(3D technologies, AEVA system (Eotech), image analysis, Infra-red camera, Dynaskin and all the other standard techniques (sebumeter, ballistometer, corneometer...)).

Clinical approach

(by dermatologists or ophthalmologists or general practitioners)
This approach is performed under the supervision of a specialist who will evaluate the efficacy of the product.

Sensorial approach

(by trained experts)
This method is based on the senses (sight and touch). Three regularly trained experts will grade parameters such as firmness, wrinkles, dimples or softness...

Emotional approach

Emotions influence our behavior and perception of the product. We draw-up tailor-made protocols according to three components *(subjective, behavior and visceral)* which are then interpreted by a Neuropsychologist.

with or without a tolerance test

CONSUMER TESTS

Perception of your product

Global Expertise, Personal Touch

The consumer test provides essential information on the perception of your product.

- Spinconso: department of Spincontrol, dedicated to consumer tests.
- 30 years of experience
- Complete supervision of the studies: *up-front reflections, choice of the protocol, preparation and implementation on fieldwork, analysis of data and elaboration of recommendations*
- Regular update of the database of panelists
- Follow-up on the panelists reliability
- Fast setting-up of studies and delivery of results

Consumer tests

Global Expertise, Personal Touch

BENCHMARK, BLIND OR BRAND STUDIES

according to 2 options:

- Questionnaires filling process at home
- Questionnaires filling process at Spincontrol' under supervision

Little extra:
Emotional approach

BENEFITS OF CONSUMER TEST

PRACTICALITY

ADAPTABILITY

PROFITABILITY

PANEL CHARACTERISTICS

- People from **all over France**: 8,000 panelists with over 300 details (including cosmetic habits, purchasing sectors, purchased brands etc...)
- People from **Tours and its suburbs**: 7,000 panelists with more than 300 details

Image processing and analysis

Global Expertise, Personal Touch

A department dedicated to image processing and analysis!

In the world of cosmetics, digital image analysis mainly consists in **proving the product efficacy, thanks to essential information assimilated in the smallest details of an image.** It also allows to :

**OBTAIN IMAGES UNDER
STANDARDIZED
CONDITIONS**

**IDENTIFY AND QUANTIFY
VARIATIONS IN SKIN
AND HAIR PARAMETERS**

**ILLUSTRATE
COSMETIC BENEFITS**

**CREATE
MARKETING SUPPORT**

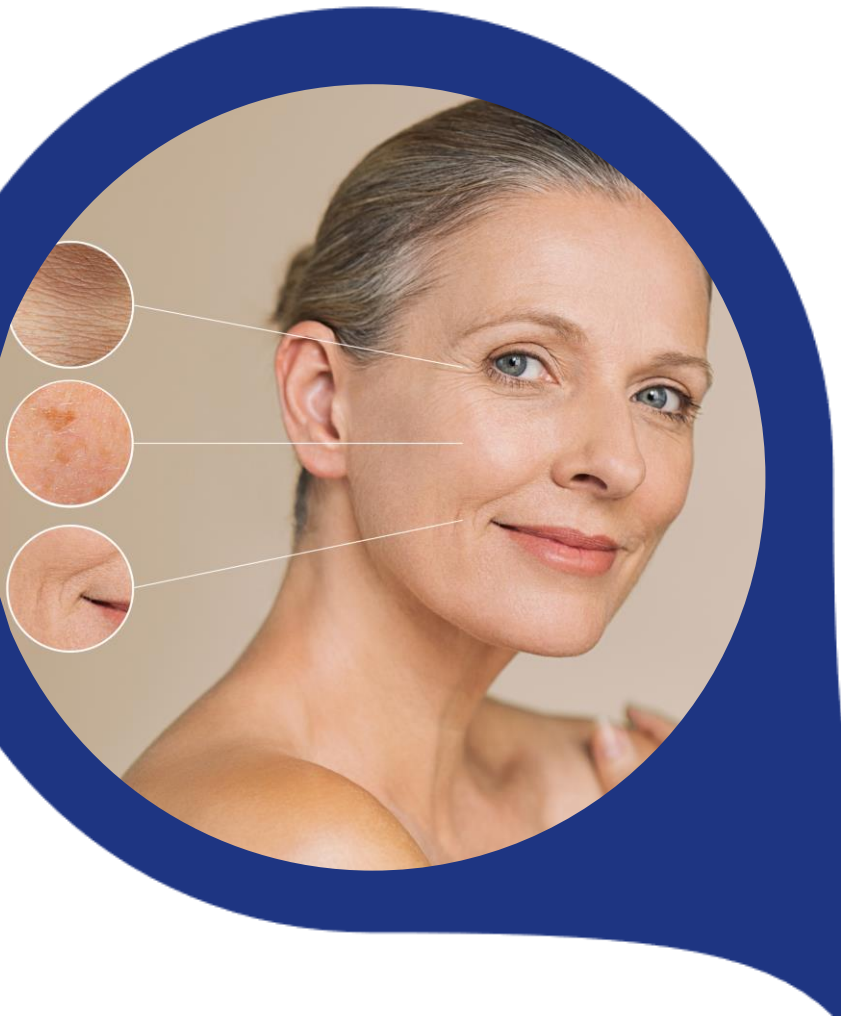

**SPIN'
ANALYSIS**

The interest is to work on standardized photos, generally taken in a laboratory with high-performance tools, which can be taken:

- In **cross-polarization**, i.e. with suppression of the light on the skin surface;
- In **parallel polarization**, i.e. with all the specular light;
- In **diffuse light**, i.e. with a homogenization of the light on the skin surface.

OBJECTIVE: TO ASSIST YOU IN PROCESSING YOUR IMAGES ON ANY TYPE OF CLAIMS.

Anti dark circles - Anti dark spot - Anti rosacea - Anti sebum effect - Anti wrinkle - Complexion homogeneity - Complexion radiance - Lifting - Matifying effect - Skin texture - Tanning effect - Whitening effect - etc

FACE CLAIMS

FRINGE PROJECTION

AEVA & DERMATOP SYSTEMS

- Anti wrinkles
3D topography: in vivo or on replicas
- Retexturizing & plumping effect
(overall roughness of the face by “radius of curvature” approach)
- Volume of the hollow cheeks
- Anti sagging effect

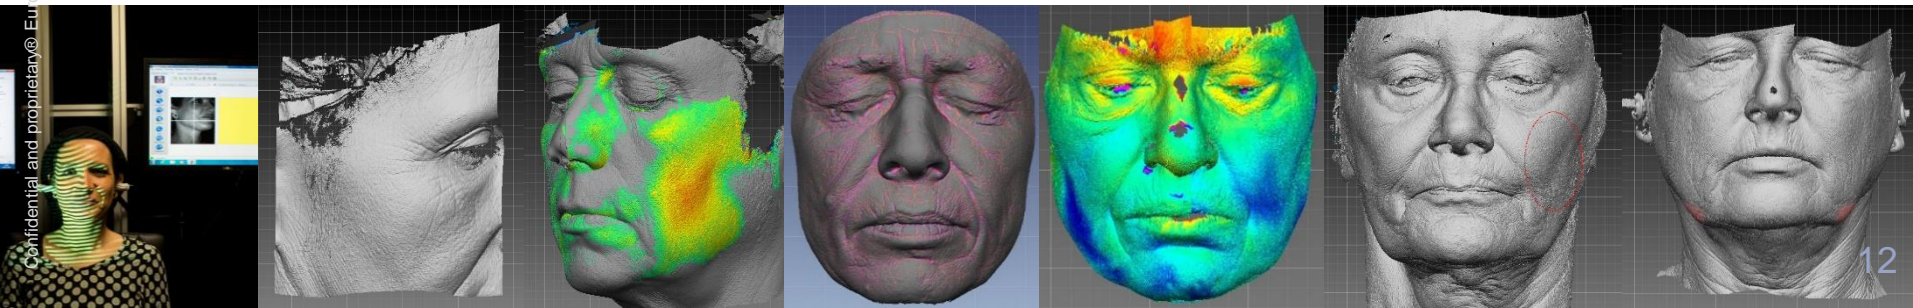

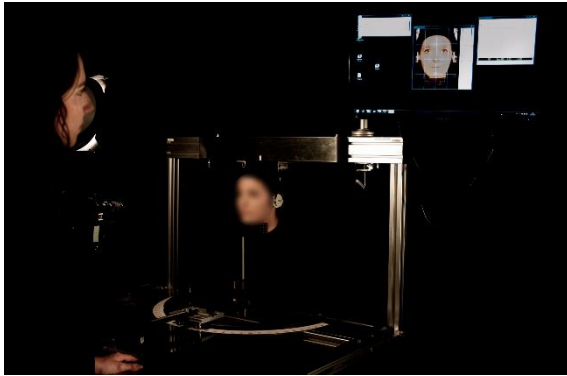

IMAGE ANALYSIS

Global 2D topography

Analysis of skin
topography

Expressive
wrinkles

After 1 month

CLINICAL ASSESSMENT

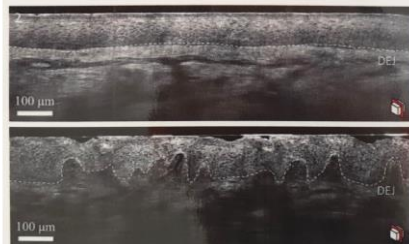

grading by trained experts in vivo or on photos

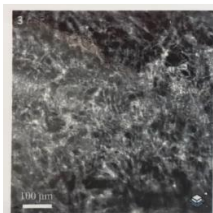

LC-OCT

Epidermis thickness

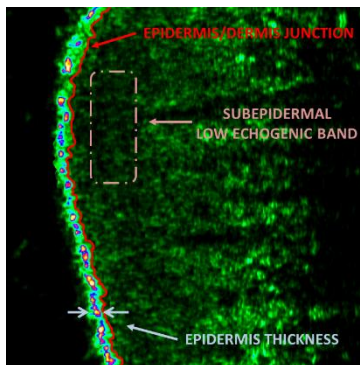

Collagen network

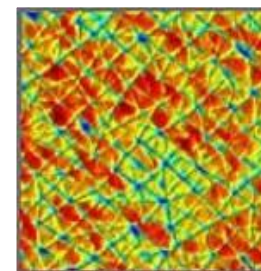

ULTRASOUND IMAGING

skin thickness & homogeneity measurement

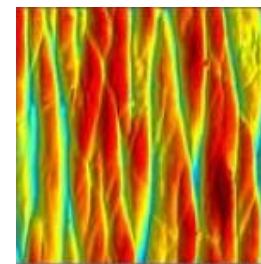

SKIN MICRO RELIEF

3D Microscopy

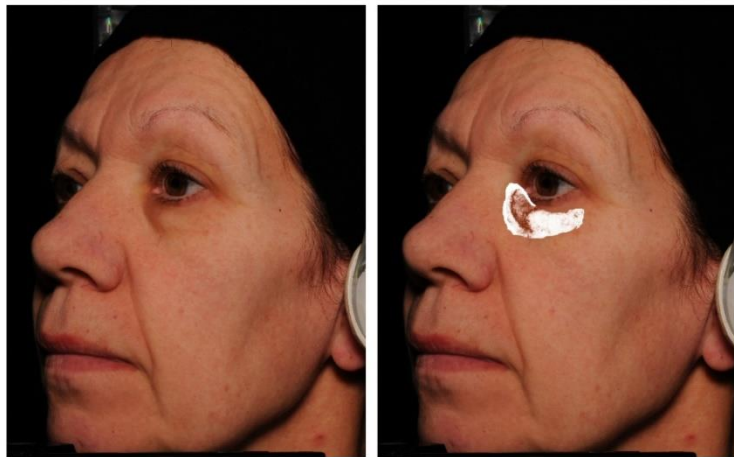

<30 years old

>70 years old

IMAGE ANALYSIS

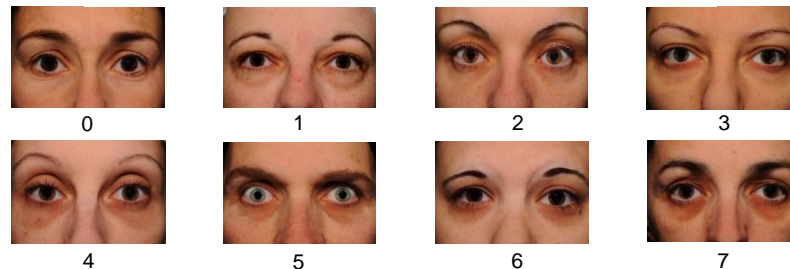

Analysis of the color intensity (due to eye-bags) or vascular or melanin component.

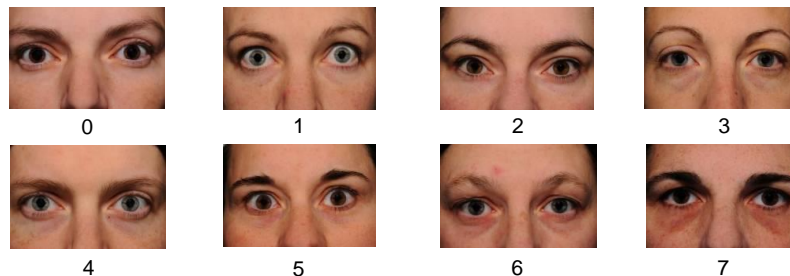

CLINICAL EVALUATION

on photos

Scale of dark-circles (**brown**) on a Caucasian skin

Scale of dark-circles (**violet-red**) on a Caucasian skin

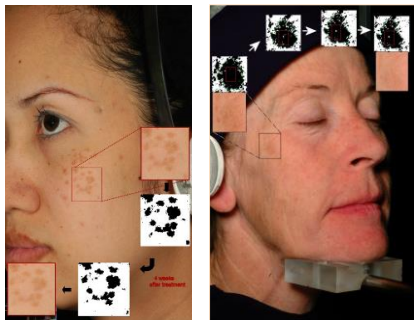

Anti dark spots

Global Expertise, Personal Touch

IMAGE ANALYSIS - Colorimetric and morphological

Analysis of selected dark spots

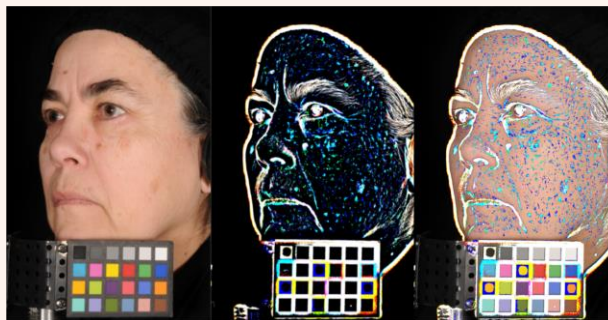

Parameters:

- Surface of one spot
- Color of one spot
- Color of carnation (around spot)

... and also **CLINICAL EVALUATION**

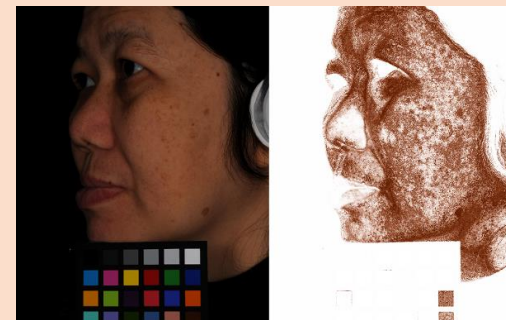

Analysis of whole skin pigmentation:

Parameters:

- Homogeneity
- Color (Spots / Skin)
- Contrast Spots/Skin

Intensity of melanin component

Parameters:

- Intensity (cheek)

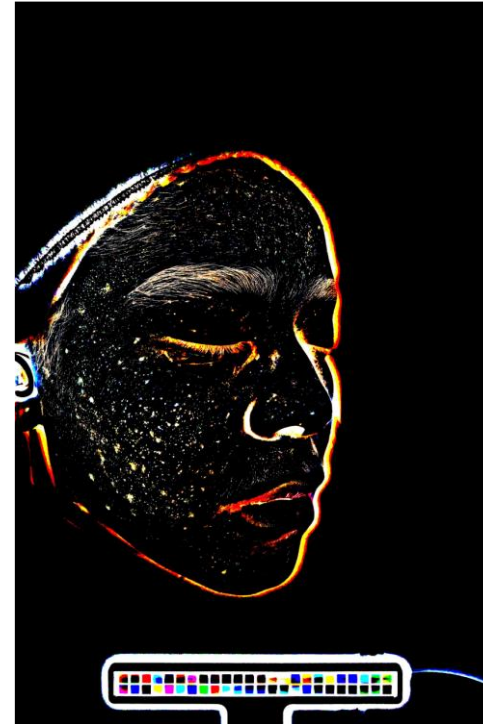

Anti dark spots

Global Expertise, Personal Touch

IMAGE ANALYSIS - Colorimetric and morphological

also suitable for phototypes V and VI

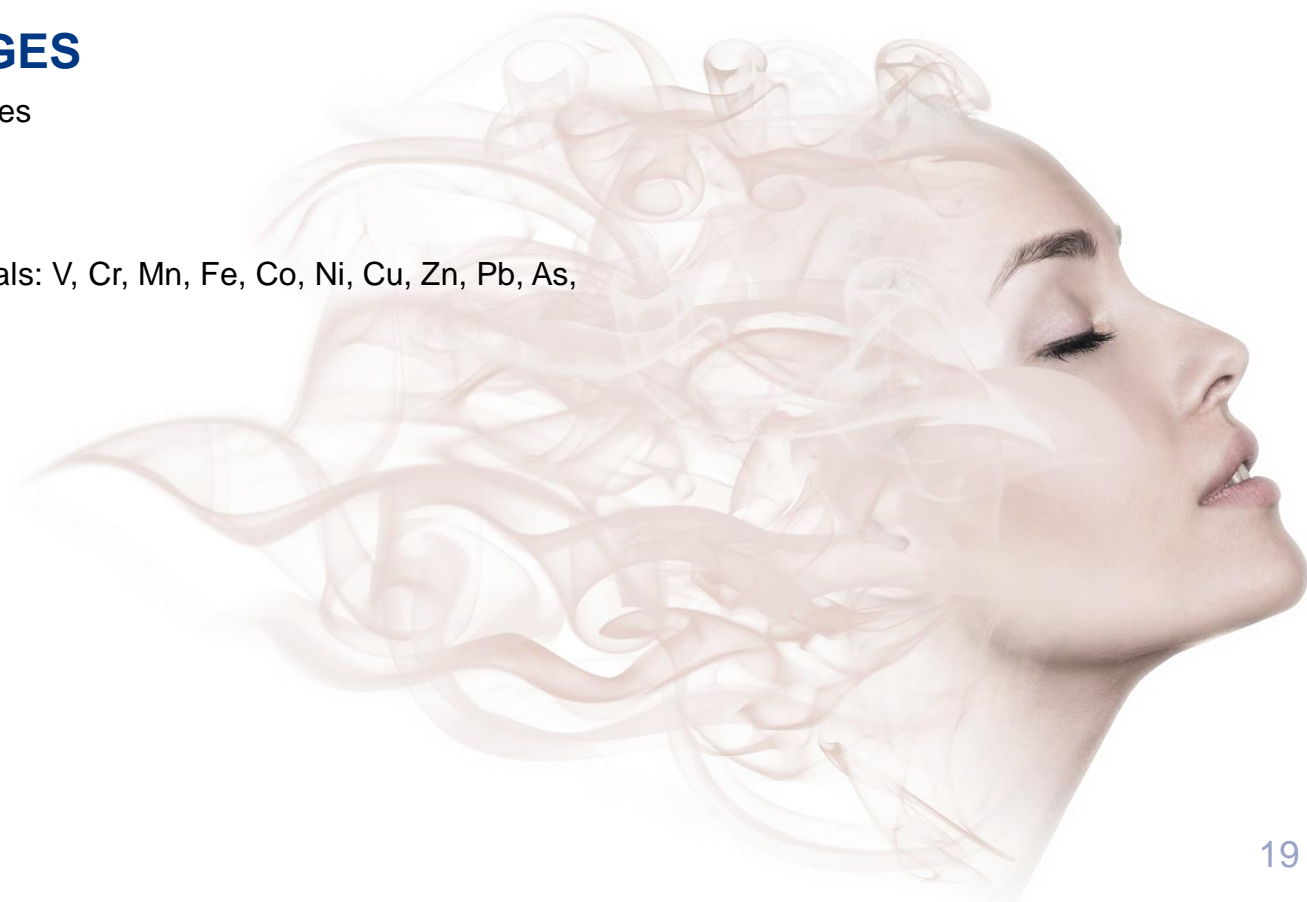

BIOCHEMICAL DOSAGES

Skin surface samples in polluted cities

2 possible dosages:

- Levels of elements as heavy metals: V, Cr, Mn, Fe, Co, Ni, Cu, Zn, Pb, As, Si et Ti
- Lipids alteration assessment

Anti-oily skin effect

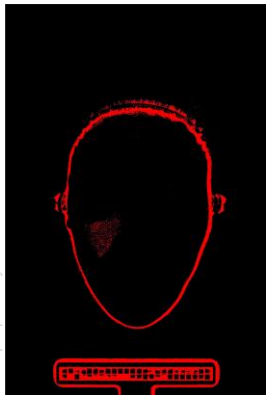

Global Expertise, Personal Touch

IMAGE ANALYSIS

Measured parameters from C-Cube images:

- Number of visible pores
- Total area of the pores
- Average diameter of the pores

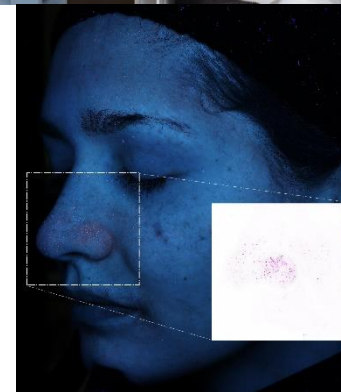

Matifying effect

Anti-sebum effect

Focused on porphyrins by Visia-CR®

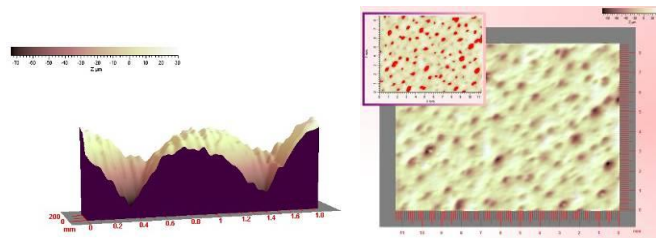

Anti-oily skin effect

Charasteristic color of
skin tone

Focus on complexion

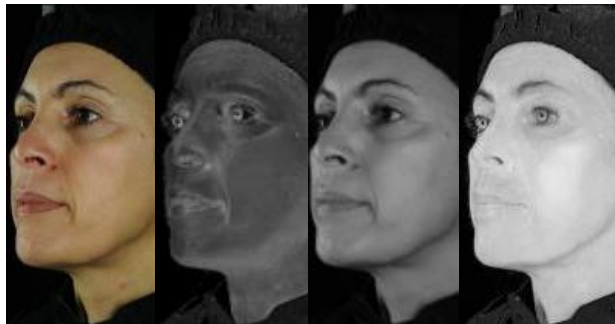

Global Expertise, Personal Touch

IMAGE ANALYSIS

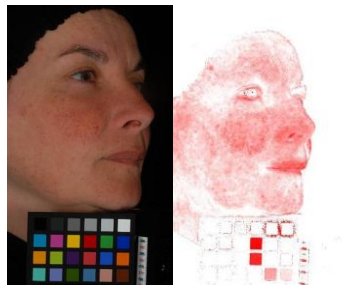

Complexion radiance - Radiance mapping

By Visioface® or Visia-CR®

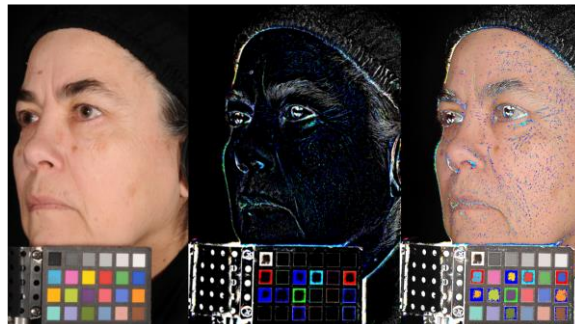

Anti rosacea – Analysis of the red component

By Visioface® or Visia-CR® and also SIAscope & mexameter

Skin Texture - Analysis of skin texture roughness

By Visioface® or Visia-CR®

C-CUBE 3D

Skin texture

Focus on complexion

Global Expertise, Personal Touch

SENSORIAL METROLOGY

Healthy glow effect

Measured parameters

- Colours of the skin: *Pink-red, olive, tan (beige, apricot-coloured, blond colour and brown colour)*
- Physical characteristics: *luminosity, homogeneity of the skin and strain on the skin*

Setting of the sensory metrology room

Structured scale of the Good complexion colours – Spincontrol

Analogical scales for "luminosity", "homogeneity" and "strain" evaluation

Complexion radiance – CLBT method

Calculation of a **C.L.B.T index** based on

- Colours,
- Luminosity,
- Brightness,
- Transparency of the skin.

Focus on beard

HAIR TUNE (Sound analysis)

Softness

XPOLAR®

Damaged - Structural analysis (Keratin) by polarimetric scanner

BODY CLAIMS

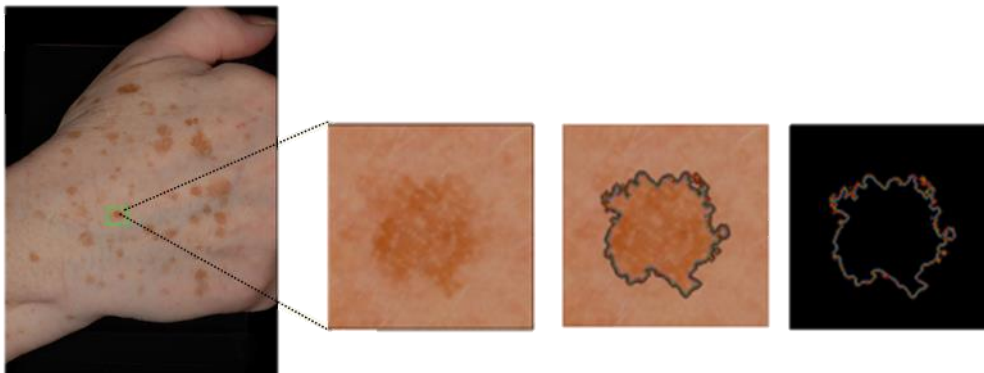

IMAGE ANALYSIS

by Visioface®, Visioscan or C-Cube

Calculated parameters :

- Colour of spots
- Colour of skin
- Sharpness of the contours
- Total area of the spots (mm²)

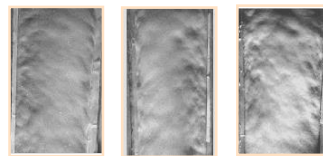

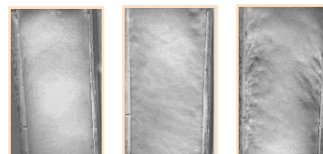

Anti-dimples

Global Expertise, Personal Touch

PROFILOMETRY 2D

Roughness of the dimples

*Roughness parameters

BIOMEDICAL STUDIES

Beyond cosmetics

- ANSM (the French Health Products Safety Agency) authorized Spincontrol to carry out clinical and biomedical studies for:
 - Cosmetic products
 - Nutritional supplements
 - Medical devices (Class I and IIA)
- Assistance in submitting to the Independent Ethical Committee (IEC) and the ANSM

Food supplements allegations

- Against tired legs
- Anti-sleeping troubles
- Anti-stress & dynamising
- Beauty of the skin (*anti-ageing, anti dark-circles, moisturizing, firming...*)
- Painkiller
- Satiety
- Slimness
- Study of the hair & nails

EMOTIONAL STUDIES

Emotions and cosmetics

Global Expertise, Personal Touch

- Well-being/Emotions
- Consumer behaviour
- Sleep analysis

WHY EMOTION?

- Efficacy tests
- Emotional design
- Consumer behavior / Decision making
- Research

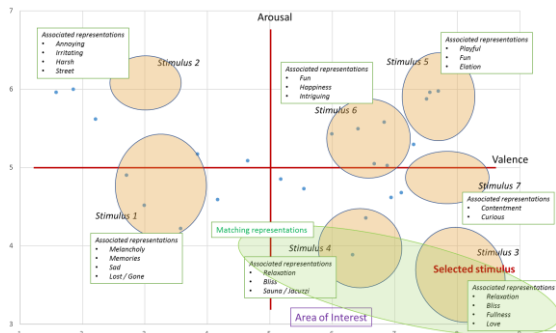

HOW TO ACCESS EMOTIONS?

- Cognition: Psychometric measures
- Behaviour: Behavioral/ethological analysis
- Physiological: Visceral component

VERBAL METHODS

SUBJECTIVE COMPONENT:

- Validated questionnaires
- Lickert-type scales
- Neurocognitive tests
- Implicit associations
- Structuration of free speech (*text mining*)

Factorial correspondence analysis after hierarchical classification – specific terms / class

PSYCHOPHYSIOLOGICAL METHODS

VISCERAL COMPONENT:

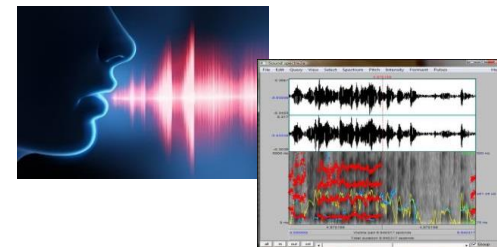

- Electrodermal response (*i.e. skin conductance*)
- Skin temperature
- Cardiac activity (*e.g. HR, HRV, BP, ...*)
- Respiratory rate
- Mydriasis
- Hormonal levels
- Electromyography
- Electroencephalography
- Brain imaging

BEHAVIORAL METHODS

BEHAVIORAL ANALYSIS

- Posture
- Gesture
- Facial expression
- Eye tracking
- Specific act
- Vocalizations

Emotional studies - Specific methods

Global Expertise, Personal Touch

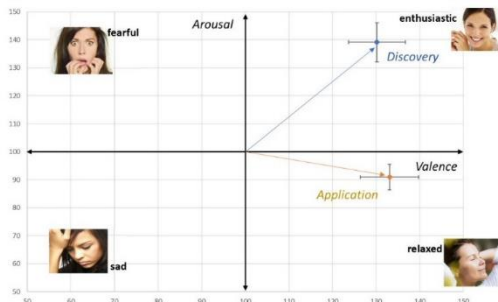

MIRROR TEST™

- Behavioral and psychometric approach
- Auto & Allo perception evaluation

Attest and quantify the anti-ageing « emotional » benefits of products because chronological age is important, but the subjective age has a stronger effect

EmoVoc™ EmoWave™

Provide emotional signature of your product...

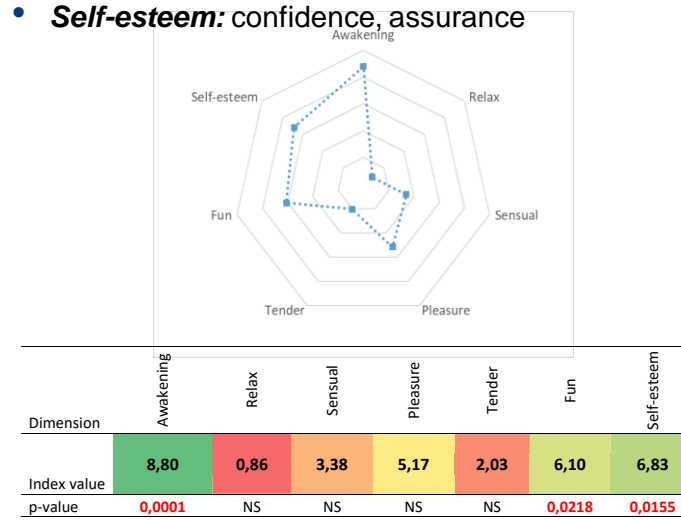

EMOIM™

Test your product by emotional 3D immersion

EMOCHAR™

Emotional characterization created by Emospin, scoring 7 main positive emotional :

- **Awakening:** focus, attention, stimulation
- **Relax:** serenity, relaxation, appeasing
- **Sensuality:** arousing, sexy, erotic
- **Pleasure:** liking, “gourmand”, satisfaction
- **Tenderness:** gentleness, softness
- **Fun:** excitement, joy, enthusiasm
- **Self-esteem:** confidence, assurance
